

SANC is a voluntary certification program based on how plants are produced rather than how those plants look at the time of a single inspection.

For more information, visit
<http://sanc.nationalplantboard.org>
or contact your
state's plant certifying agency.

SANC framework elements for nurseries and greenhouses:

- Pest Risk Analysis
- Identifying Critical Control Points
- Implementing Best Management Practices
- Scouting for pests
- Keeping good records
- Working with your state certifying agency
